

HEIGHT ADJUSTABLE VIDEOWALL ON WHEELS

HEIGHT ADJUSTABLE VIDEOWALL ON WHEELS

Inquiry

Request:

After a tender Fidato in Arnhem, the Netherlands, has been chosen as the AV system integrator for the revitalization of the headquarters of a.s.r. Nederland N.V. built in 1974.

The location counts approx. 84.000 m2 and has approximately 2.800 flexible workstations for 4.000 employees.

Because of the wide variety of presentations and seminars a.s.r. needed a flexible solution. Fidato turned to SmartMetals for a corresponding solution.

Solution:

We developed a versatile solution making it possible for the customer to use a 3x3 VideoWall in multiple rooms. The VideoWall has wheels and therefore is easy to move. This way a variation of set-ups is possible within a room.

With nine 55 inch screens this VideoWall offers the opportunity to give presentations to large audiences. And with its electrical height adjustability the screens can easily be risen above the audience.

Concept:

By choosing for a SmartMetals mounting solution and the services by Fidato, a.s.r. can give presentations and seminars to large audiences in different locations within the building.

a.s.r. is a Dutch insurance company for all insurance. a.s.r. has nearly 3900 employees and with a turnover of € 3.8 billion, a.s.r. is one of the largest insurers in the Netherlands.
