

Projector ceiling mount

002.3410B H1 Projector ceiling mount BLACK ø 80mm, 204mm (excl. projector specific bracket)

The SmartMetals ceiling mounts fit virtually any projector and are available in a range of standard lengths. This series offers for the heavier projectors (max. 70 kg), a quick and simple installation of the projector to the ceiling. The mounts are available in black and white, in a short as well as adjustable lengths (incl. drop down protection). We have fitted them with a ball joint, which allows a projector to be secured in a 15 degree angle, and under a 90 degree angle (with a weight limitation of the projector of just 40kg). A projector specific bracket requires to be added; we have taken into account the projector's lens position and its centre of gravity for a perfect positioning.

Projector ceiling mount
