

Single stand head

063.1025 EOL | Stand head, single construction with tilt function (incl. 063.1035 20mm 1x)

This stand head with four point coupling mounting system is especially developed for our fully divisible stands which are used in a VideoWall configuration. A bracket with three point coupling can be added, which by adding the additional coupling bolt can be used as four point coupling mounting system. A tilt function of $+1^{\circ}$ till -4° is integrated which helps to level the displays on the stand. By connecting the stands with our stabilizing bars (063.0900) the set will offer a strong and easy to build up VideoWall construction. For a 3x3 configuration a stand extension piece of 95 cm (063.0295) is available to lengthen the columns to 285 cm.

**This product is "End of Life" and will no longer be produced.
It can be supplied as long as stock lasts.**

Single stand head

Features

Weight: 7.35 kg

Colour: Dark grey

Maximum load: 85 kg
