

Mounting kit incl. white boards

152.0110-LS Mounting kit incl. white boards of lacquered steel for touch screen 55 - 70 inch, max. 1750mm x 1050mm (LxH)

This whiteboard kit is made of lacquered steel on both sides enclosed by an aluminium frame. These whiteboards are custom-made for your touch display or whiteboard model. Compared to enamel steel, lacquered steel offers usage stains of markers easily. A proper cleaning is strongly recommended. SmartMetals offers 1 year warranty on the surface of a lacquered steel whiteboard. This mounting kit creates a fixed or an in height adjustable solution for optimal use of your presentation tool.

The whiteboards and mounting kits are custom made to perfectly fit your (touch) monitor. Please specify upon order what brand and type (touch) monitor you are using. If the VESA mounting of your monitor is not centered from the middle or your monitor is fitted with a fixed pentray, it may be necessary to adjust the frame. This can have consequences for the costs; of course you may contact us in advance to avoid surprises afterwards.

Mounting kit incl. white boards

Features

Minimum length: 580 - 1050 mm (height)
Maximum length: 1170 - 1750 mm (length)
