

Business & VC Trolley

062.2860 EOL | Business & VC trolley static, max. 86 inch max 100 kg

Besides our standard trolleys with and without height adjustment, used mostly in education, we have made available a range of movable solutions for the use of (touch-)flat panels and VideoConferencing in the business market. These trolleys have a luxurious look and feel and offer the space to easily place your peripheral equipment out of sight in the enclosure. Available are several accessories to build-in such equipment and for a VideoConference camera or a soundbar are easy to mount adapters available.

De 062.2860 is a solution on wheels and offers a fixed highest position for monitors between 55 - 86 inch with a maximum weight of 100 kg. The monitor's centre can be freely determined from 1250 - 1500 mm from the floor; making the trolley ideal for use in meeting rooms and (compact) boardrooms. In case a higher position of the monitor is preferred, one could opt for the 062.2870 or one of the other electrical height-adjustable trolleys. Of course the SmartMetals team is there to help with advice and making the proper choice for your installations.

**This product is "End of Life" and will no longer be produced.
It can be supplied as long as stock lasts.**
