

SmartKiosk

102.1040 SmartKiosk Portrait for 40 inch flat panels

The flat screen totem is especially suitable for information purposes like in large shopping malls or at airports and train stations. We also experience the solutions being implemented in for example supermarkets, where Digital Signage solutions are used for commercial use and as mean to influence the purchasing behaviour of the consumer. Both the front- and back plate are removable for service or maintenance. The monitor is attached by means of an in height and dept adjustable interface. In the bottom of the totem we have reserved space for a PC or mediaplayer. The back side of the totem is fitted with ventilation holes, which are also suitable for adding blister hooks as point-of-sale. The SmartKiosk is available on request, at no extra charge, in several RAL colours such as RAL9005 black, RAL9010 white and RAL9006 silvergrey. Distinctive, less common RAL colours are also possible, however against extra costs (to be determined only based on the specific RAL colour).

SmartKiosk

Features
