

## VideoConferencing trolley

### **INT.1015 VideoConferencing trolley max. 90 inch incl. 2 small platforms (economy version)**

Videoconferencing is a set of interactive telecommunication techniques, which allows two locations to exchange information at the same time (with vision and sound). This form of visual collaboration is used by companies to meet with their subsidiaries or international partners saving travel costs and time. For videoconferencing, the end-user is often looking for a mobile solution to which a single screen, a codec and a camera can be attached. The set would then be suitable for use in multiple rooms. SmartMetals has developed a wheeled stand, suitable for displays to 90 inch, with a codec and camera support. One of the following screen mounts should be added: 052.1000/.2000/.6000, which can be chosen based upon the weight and mounting pattern of the screen.

## VideoConferencing trolley

### Features

**Minimum length:** 1250 mm

**Maximum length:** 1600 mm (centre screen)

**Weight:** 32.40 kg

**Colour:** Dark grey, Aluminium

**Maximum load:** 85 kg

**Screen position:** Landscape, Portrait

**Inch range:** max. 90 inch

**Mobile / fixed:** Mobile

**Height adjustment:** Manual

**Bracket/interface:** Excluded

**Type bracket/interface:** Universal

**Mounting system:** 170 x 140 mm

**Cable duct:** 15, 35, 15 mm
