

VideoConferencing trolley

INT.1030 VideoConferencing stand-trolley up to 65 inch, 60 kg + 2 small supports

Videoconferencing is a set of interactive telecommunication techniques, which allows two locations to exchange information at the same time (with vision and sound). This form of visual collaboration is used by companies to meet with their subsidiaries or international partners saving travel costs and time. For videoconferencing, the end-user is often looking for a mobile solution to which a single screen, a codec and a camera can be attached. The set would then be suitable for use in multiple rooms. SmartMetals has developed a wheeled stand, suitable for displays to 65 inch, with a codec and camera support. One of the following screen mounts should be added: 052.1000/.2000/.6000, which can be chosen based upon the weight and mounting pattern of the screen.

VideoConferencing trolley

Features

Minimum length: 1250 mm

Maximum length: 1600 mm (centre screen)

Weight: 54.00 kg

Colour: Dark grey, Aluminium

Maximum load: 60 kg

Screen position: Landscape, Portrait

Inch range: max. 65 inch

Mobile / fixed: Mobile

Height adjustment: Manual

Bracket/interface: Excluded

Type bracket/interface: Universal

Mounting system: 170 x 140 mm

Cable duct: 15, 35, 15 mm Ø
